

CAREER OBJECTIVE

Aspiring Software Engineer pursuing a B.Tech in Computer Science Engineering (AI & ML) at Vel Tech University, seeking to apply strong foundations in Java, Python, JavaScript, REST APIs, and SQL toward full-stack and Generative & Agentic AI (Google Gemini, Google ADK, OpenRouter) roles. Built PhishHunter AI (phishing detection Chrome extension), CivicVoice (civic issue reporting platform), and Axis (voice-driven AI browser agent), and eager to bring this experience to a growth-focused engineering team.

EDUCATION

B.Tech, Computer Science Engineering (AI & ML) <i>Vel Tech University, Chennai, India</i>	2023 – Present
Higher Secondary (Class XII) <i>Sri Chaitanya, Visakhapatnam, India</i>	2022 – 2023
Secondary School (Class X) <i>Vijayam, Visakhapatnam, India</i>	2020 – 2021

TECHNICAL SKILLS

Programming Languages:	Java, Python, JavaScript, SQL, PHP
Web Development:	HTML5, CSS3, Bootstrap 5, Tailwind CSS, PHP 8, MVC
Backend & Databases:	MySQL 8.0, SQL Optimization, REST API, MySQL Workbench
AI & Machine Learning:	NumPy, Pandas, Scikit-learn, NLTK, TF-IDF, Matplotlib, Gemini API, Prompt Engineering, Agentic AI
Tools & IDEs:	Git, GitHub, VS Code, XAMPP, Agile/Scrum
Core CS Concepts:	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

PhishHunter AI — AI-Powered Phishing Detection	GitHub
Skills: Python, Flask, JavaScript, HTML, CSS, Bootstrap, Scikit-learn, NLP, REST API, Git, GitHub, Render, Chrome Extension (Manifest V3) - Developed an AI-powered Chrome Extension to analyze URLs, emails, and SMS messages for phishing detection using Machine Learning, NLP, and heuristic analysis. - Built a Flask REST API and deployed it on Render to provide cloud-hosted, real-time phishing detection services. - Integrated domain reputation analysis, redirect detection, suspicious keyword identification, and intelligent threat scoring. - Designed a responsive browser extension interface that provides risk scores, threat indicators, and actionable recommendations. - Improved practical experience in REST API development, browser extension architecture, cloud deployment, and AI-powered content analysis.	
CivicVoice — AI-Powered Civic Issue Reporting Platform	GitHub
Skills: React (Vite), Node.js, Express.js, Python, FastAPI, MySQL (Aiven), JWT Auth, Vercel, Render - Built a full-stack platform enabling citizens to report civic infrastructure issues with geolocation tagging, and giving administrators a dashboard to track and resolve them. - Designed a Python/FastAPI microservice for AI-driven urgency scoring and automated duplicate report detection, integrated with the Node.js backend via REST APIs. - Implemented hotspot clustering (DBSCAN) to identify recurring problem zones, JWT-based authentication with OTP email verification, and role-based access control for citizens, officials, and admins. - Deployed the full distributed system to production — frontend on Vercel, backend and ML microservice on Render, and MySQL database on Aiven Cloud.	
Axis — Voice-Driven AI Browser Agent	GitHub
Skills: Google ADK, Gemini, FastAPI, WebSockets, MySQL, Chrome Extension (Manifest V3), Docker, Render - Built a Manifest V3 Chrome extension that lets users control the browser by voice, combining live DOM analysis and screenshots to plan and execute real actions. - Architected a full-stack agent system streaming voice, DOM, and screenshot data over WebSockets to a FastAPI backend orchestrating a Google ADK agent powered by Gemini. - Implemented multi-tool agent planning so the agent reasons over available tools (DOM actions, browser control, WebMCP, screenshots, image generation) to execute multi-step tasks.	

CERTIFICATIONS

- Introduction to Modern AI — **Cisco Networking Academy**
- Certificate of Completion: Claude Code 101 — **Anthropic**
- Mastering AWS Certified AI Practitioner (AIF-C01) — **Udemy**
- Deloitte Australia — Data Analytics Job Simulation — **Forage**
